The Board of Trustees
City of Grand Rapids Police
and Fire Retirement System
Grand Rapids, Michigan

Dear Board Members:

The results of the ***December 31, 2010 Actuarial Valuation*** of the City of Grand Rapids Police and Fire Retirement System are presented in this report. The purpose of the annual valuation is to measure the system's funding progress and to determine the City's contribution rate for the ensuing fiscal year in accordance with established funding policies. The results of the valuation may not be applicable for other purposes.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as: plan experience differing from that anticipated by the economic and demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Due to the limited scope of the actuary's assignment, the actuary did not perform an analysis of the potential range of such future measurements.

The actuarial methods and assumptions used in the actuarial valuation are summarized in Section C of this report. The assumptions are established by the Board after consulting with the actuary.

The valuation was based upon statistical data, furnished by your Executive Director concerning Retirement System benefits, financial transactions, and individual members, terminated members, retirants and beneficiaries. Data was checked for internal and year-to-year consistency, but was not otherwise audited.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge, this report is complete and accurate and was made in accordance with generally recognized actuarial methods in accordance with standards of practice prescribed by the Actuarial Standards Board and in compliance with the constitution of the State of Michigan. The actuarial assumptions used for the valuation produce results which we believe are reasonable.

The undersigned Members of the American Academy of Actuaries (MAAA), and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Respectfully submitted,

Norman L. Jones, FSA, EA, MAAA

David L. Hoffman

Randall J. Dziubek, ASA, EA, MAAA

SECTION A

VALUATION RESULTS

**CONTRIBUTIONS TO PROVIDE BENEFITS
FOR THE FISCAL YEAR BEGINNING JULY 1, 2010
BASED UPON A DECEMBER 31, 2010 VALUATION DATE**

Contributions for	% of Valuation Payroll	% of Gross-Up Payroll
Normal cost of benefits:		
Age & service pensions	18.56 %	16.51 %
Disability pensions	4.02 %	3.58 %
Death-in-service pensions	0.60 %	0.53 %
Refunds of member contributions	0.27 %	0.24 %
Totals	23.45 %	20.86 %
Member Contributions (weighted average)	4.70 %	4.18 %
Employer Normal Cost	18.75 %	16.68 %
Unfunded Actuarial Accrued Liabilities*	5.06 %	4.50 %
Section 1.263(2) Full Funding Credit*	0.00 %	0.00 %
INITIAL COMPUTED EMPLOYER RATE	23.81 %	21.18 %
Ordinance Section 1.263(3) Reduction+	N/A	N/A
ADJUSTED COMPUTED EMPLOYER RATE@	23.81 %	21.18 %

* Amortized as a level percent-of-payroll over a period of 30 years.

@ In addition to this percent-of-payroll contribution, the City contributes for (i) certain Supplemental Benefits for a small, closed group of retirants and beneficiaries in accordance with the provisions of Ordinance Section 1.292, and (ii) 0.5% of payroll to provide a Medicare Supplement for members retiring after June 30, 1990.

+ See page A-3 for derivation of Ordinance Section 1.263(3) reduction.

DETERMINING EMPLOYER DOLLAR CONTRIBUTIONS

For any period of time, the percent-of-payroll contribution rate needs to be converted to dollars – and then contributed to the Retirement System in a timely manner.

The recommended procedure is: (1) *at the end of each payroll period, multiply the active member payroll for the period by the employer contribution percent*; and (2) *promptly contribute the dollar amount so determined*.

Valuation payroll is \$34,665,767.
“Gross-Up” payroll is \$38,963,670.

**ALLOCATION OF VALUATION ASSETS
YEAR ENDED DECEMBER 31, 2010**

In financing the actuarial accrued liabilities, Valuation Assets of \$328,609,947 were distributed as follows:

Reserves for	Present Valuation Assets Applied to			Totals
	Member Actuarial Accrued Liabilities	Retired Life Actuarial Accrued Liabilities	Contingency Reserve	
Member Contributions (MDF)	\$ 30,862,646			\$ 30,862,646
Employer Contributions (EAF)	58,265,047			58,265,047
Retired Benefit Payments (BRF)	(3,680,056)	\$ 187,767,588		184,087,532
Undistributed Income (IEF)	(10,252,959)			(10,252,959)
Valuation Asset Adjustment	65,647,681			65,647,681
Totals	\$140,842,359	\$ 187,767,588	\$0	\$328,609,947

Assets were applied against actuarial accrued liabilities in determining unfunded actuarial accrued liabilities as follows:

	Retired Lives	Active Members	Total
Computed Actuarial Accrued Liabilities and Reserves	\$187,767,588	\$ 172,805,763	\$360,573,351
Applied Assets	187,767,588	140,842,359	328,609,947
Unfunded Actuarial Accrued Liabilities/ (Full Funding Credit)	\$ 0	\$ 31,963,404	\$ 31,963,404

DERIVATION OF ORDINANCE SECTION 1.263(3) REDUCTION FOR THE FISCAL YEAR BEGINNING JULY 1, 2011

Section 1.263(3) reads as follows:

“Notwithstanding the offset to current service contributions under Section 1.263(2), the City shall make a contribution in the amount determined in this paragraph. **In the event the System has greater Valuation Assets than actuarial accrued liabilities, the City will pay its current service contribution during its next ensuing fiscal year reduced by 10% for each 1%, or portion thereof, that Valuation Assets exceed the actuarial accrued liabilities, as determined on the prior December 31 valuation date,** except as provided below. The unreduced current service contribution will be paid during the City’s next ensuing fiscal year if the Market Value of Assets on the March 31 prior to the next ensuing fiscal year for the City is less than 95% of the actuarial accrued liability determined on the prior December 31. No contribution will be made during the City’s next ensuing fiscal year if the Market Value at the March 31 prior to the City’s next ensuing fiscal year exceeds the actuarial present value of expected future benefit payments determined on the prior December 31. This subsection (3) shall be effective beginning with the contribution rate for July 1, 1994 (FY 1995).”

The 110% test specified in the second sentence is applied as follows:

	December 31, 2010
(1) Actuarial Accrued Liabilities	\$360,573,351
(2) Valuation Assets	328,609,947
(3) Funding Ratio: (2)/(1)	91.14%
(4) City Current Service Contribution (Employer Normal Cost from page A-1)	16.68%
(5) Percentage reduction: [(3)-100%] x 10 (if greater than 100%, use 100%)	None
(6) Ordinance Section 1.263(3) rate: (4) - [(4) x (5)]	N/A
(7) Contribution rate after 1.263(3) reduction: Lessor of (i) initial computed employer rate, or (ii) Section 1.263(3) rate, but not less than zero.	21.18%

DERIVATION OF EXPERIENCE GAIN (LOSS)

Actual experience will never (except by coincidence) coincide exactly with assumed experience. Gains and losses often cancel each other over a period of years, but sizeable year-to-year fluctuations are common. Detail on the derivation of the experience gain (loss) is shown below, along with a year-by-year comparative schedule.

	December 31, 2010	December 31, 2009
(1) UAAL* at start of year	\$14,003,017	\$(36,236,322)
(2) Normal cost from last valuation	7,418,474	5,845,072
(3) Actual employer contributions	3,709,786	0
(4) Interest accrual: [(1) + 1/2[(2) - (3)] x 0.075	1,189,302	(2,498,534)
(5) Expected UAAL before changes: [(1) + (2) - (3) + (4)]	18,901,007	(32,889,784)
(6) Effect of benefit changes	0	18,926,046
(7) Effect of revised actuarial assumptions or valuation methods	2,172,635	0
(8) Change in the SPDR (13th Check Reserve) Distribution Pension Reserve Account	0	0
(9) Expected UAAL after changes: (5) + (6) + (7) + (8)	21,073,642	(13,963,738)
(10) Actual UAAL at end of year	31,963,404	14,003,017
(11) Gain (loss): (9) - (10)	(10,889,762)	(27,966,755)
(12) Gain (loss) as percent of the beginning liabilities at start of period (\$360,573,351)	(3.0)%	(9.0)%

* *Unfunded Actuarial Accrued Liabilities.*

Valuation Date	Experience Gain (Loss) as % of Beginning Accrued Liability
12/31/2003 @	12.8 %
12/31/2004	3.0 %
12/31/2005	1.7 %
12/31/2006	6.9 %
12/31/2007	3.1 %
12/31/2008	(31.1)%
12/31/2009	(9.0)%
12/31/2010	(3.0)%

@ *One-half year ended December 31.*

SUMMARY STATEMENT OF SYSTEM RESOURCES AND OBLIGATIONS
YEAR ENDED DECEMBER 31, 2010

PRESENT RESOURCES AND EXPECTED FUTURE RESOURCES

A.	Present valuation assets:	
	1. Net assets from system financial statements	\$312,312,713
	2. Market (Funding) value adjustment	<u>16,297,234</u>
	3. Valuation assets	328,609,947
B.	Actuarial present value of expected future Employer contributions:	
	1. For normal costs	56,805,575
	2. For unfunded actuarial accrued liability	<u>31,963,404</u>
	3. Total	88,768,979
C.	Actuarial present value of expected future member contributions	<u>12,397,824</u>
D.	Total Present and Expected Future Resources	<u><u>\$429,776,750</u></u>

ACTUARIAL PRESENT VALUE OF EXPECTED FUTURE BENEFIT PAYMENTS

A.	To retired lives:	
	1. Annual allowances	\$187,767,588
	2. Reserve	<u>none</u>
	3. Total	187,767,588
B.	To vested terminated members	5,281,160
C.	To present active members:	
	1. Allocated to service rendered prior to valuation date (actuarial accrued liability)	167,524,603
	2. Allocated to service likely to be rendered after valuation date	<u>69,203,399</u>
	3. Total	236,728,002
D.	Total Present Value of Expected Future Benefit Payments	<u><u>\$429,776,750</u></u>

COMMENTS, RECOMMENDATIONS AND CONCLUSION

COMMENT A: Overall experience fell short of expectations during the period ending December 31, 2010 (see page A-4). Recognized return on a funding value basis was the primary source of loss. Even though the market rate of return for 2010 was nearly 17%, the funding value return was 2% due to continued recognition of assets losses from the prior years. The recognized investment losses were partially offset by gains in other experience areas, primarily wages.

COMMENT B: Before consideration of Board adopted assumption changes, the employer contribution rate increased from 20.96% to 22.96% and the funded ratio decreased from 96.0% to 91.6% as a result of the experience discussed in Comment A above.

COMMENT C: The December 31, 2010 actuarial valuation reflects economic and demographic assumptions adopted by the Board.

The Board adopted recommendations presented by the actuary as part of the recently completed five-year experience study. The key change in these assumptions was the lowering of the investment return assumption from 7.5% to 7.25% and lowering the wage inflation assumption from 4.00% to 3.50%.

In a second meeting, the Board adopted an investment return assumption that reflected the cessation of the 13th check program for member classification groups that had negotiated guaranteed post-retirement benefit increases. This change is modeled by eliminating the reduction in the investment assumption to reflect the “skimming” that results as part of the 13th check program. The investment return assumption then used for these groups is 7.5% for any member that does not participate in the 13th check program. The post-retirement increases are now reflected in the valuation (detail on the groups affected and the actual benefit can be found on pages B-6 and B-7).

In combination, these changes result in a lower employer contribution rate (down from 22.96% to 21.18%) for fiscal year 2012.

COMMENT D: Below is the 5-year contribution rate projection based on all future experience matching exactly with our assumptions of future experience and a 30 year amortization period for the Police-Fire Retirement System.

7.5% Market Return in 2011-2014								
Valuation Year	Funding Value (\$ millions)	Employer Rate	Employee Rate	Total Rate	Funded Ratio	MV Return	MV-FV (\$ millions)	MV (\$ millions)
2010	\$329	21.18%	4.18%	25.36%	91%	16.7%	\$(16)	\$312
2011	322	19.73%	8.00%	27.73%	86%	7.5%	1	323
2012	318	21.21%	8.40%	29.61%	81%	7.5%	16	334
2013	342	19.49%	8.40%	27.89%	84%	7.5%	5	346
2014	359	18.84%	8.40%	27.24%	86%	7.5%	1	359

Note: Contribution rates are for the fiscal year beginning six months after the valuation date. Gains and losses in other risk areas may also have a material effect on contribution rates in future years.

RECOMMENDATION FOR RESERVE TRANSFER. Inter-fund transfers are made either when (i) there is a residual December 31 balance in the Income-Expense Fund (IEF) after regular interest credits have been made or (ii) the year-end balance in the Benefit Reserve Fund (BRF) falls below the present value of benefits currently being paid. On December 31, 2010 there was a balance in the IEF (see page B-9). Therefore, the following adjusting transfers are recommended:

Transfer From	Transfer To	Amount
EAF	BRF	\$ 3,680,056
EAF	IEF	10,252,959

For valuation purposes, it was assumed that recommended transfers would be made. Ending balances, on a cost basis in each reserve fund as of December 31, 2010, were assumed to be as follows:

MDF	EAF	BRF	IEF
\$30,862,646	\$44,332,032	\$187,767,588	\$0

CONCLUSION. The City's contribution rate for the fiscal year beginning July 1, 2011 has been computed to be 21.18% of active member gross-up payroll based on the funding policy specified in the retirement ordinance.

- * Revised actuarial assumptions.
- # Retirement System amended.
- @ One-half year ended December 31.
- + 87% on a market value basis.

- Valuation Assets as a Percent of AAL** is a traditional measure of a system's funding progress. Except in years when the system is amended or actuarial assumptions are revised, this percent can be expected to move gradually toward 100%.
- UAAL as a Percent of Valuation Payroll** is another relative index of condition. Unfunded actuarial accrued liabilities represent debt, while active member payroll represents the system's capacity to collect contributions to pay toward debt. The lower the percent, the greater the financial strength and vice-versa.

SECTION B

VALUATION DATA

SUMMARY OF BENEFIT PROVISIONS EVALUATED DECEMBER 31, 2010

Voluntary Retirement. Police members may retire after attaining age 50 and completing 10 years of service. Firefighter members are eligible for retirement after attaining age 55 with 10 or more years of service. Firefighter members may also retire at the age their service reaches the service credit limit.

Compulsory Retirement. None.

Final Average Salary (FAS). The average of member's highest annual salary rates during the 3 consecutive calendar years of credited service when such compensation rates are the highest increased by the applicable FAS Adjustment Factor (12.2% for Police members and 12.7% for Firefighter members for the period July 1, 2011 to June 30, 2012). Highest salary rates that occur in calendar years after the calendar year in which the member reaches their service credit limit will not be included in the FAS.

Benefit Multiplier Description. See page B-2.

Benefit Multiplier. The member's benefit multiplier, used to compute full age and service allowance, is defined in the following table:

Benefit Multipliers and Allowance Caps for Member Groups

Covered Group	Date of Hire	Benefit Multiplier	Allowance Cap
Firefighters	Prior to July 1, 1992	2.5%	100%
	-or-		
	Prior to July 1, 1992 with up to 35 years of credited service	2.7%	94.5%
	July 1, 1992 or after	2.7%	90%
Fire Chief	At any time	2.8%	94.5%
Police Command	Prior to July 1, 2001	2.8%	100%
	July 1, 2001 or after	2.8%	80%
Police Chief or Deputy Police Chief	At any time	2.8%	100%
Police Officers and Sergeants	Before March 9, 1995	2.8%	100%
	After March 8, 1995	2.8%	87.5%
	July 1, 2001 and after	2.8%	80%

The benefit multiplier is 2.8% for Firefighters retiring on or after July 1, 2012.

Full Age and Service Allowance. Allowance, payable monthly for life to the retired member, equals the member's benefit multiplier times the member's FAS times years of credited service. In lieu of this single life-level amount form of payment, a retiring member may elect from a variety of optional forms of payment, each of which is the actuarial equivalent (same lump sum value at time of retirement) of the single life-level payment form.

Deferred Allowance. A member with 10 or more years of service who leaves covered employment before retirement is eligible to receive an allowance computed in the same manner as an age and service allowance but based upon the member's employment record to the time of leaving. Such deferred allowance commences the first day of the calendar month next following the later of the date of the member's attainment of age 50 or the date when written application therefore is received by the Board. Benefits may be actuarially reduced in accordance with the Early Retirement provision if applicable.

Early Allowance. A Firefighter member who leaves covered employment after both attaining age 50 and completing 10 years of service is eligible to receive an immediate early allowance (in lieu of a deferred allowance), computed in the same manner as a deferred allowance based upon the member's employment record to the time of early retirement, but actuarially reduced (per schedule in ordinance) to reflect the fact that the age when payments begin is younger than age 55.

Duty Disability Allowance. A member who becomes totally and permanently disabled from duty-connected causes is eligible to receive, subject to offsets, a duty disability allowance computed in the same manner as a full age and service allowance based upon the member's employment record to the time of disability with a minimum allowance before offset of 72% of FAS. The maximum allowance after offsets is 90% of final salary less amounts received from (i) Worker's Compensation, (ii) gainful employment as a law enforcement officer or firefighter, and (iii) Social Security disability income.

Non-Duty Disability Allowance. A member with 1 or more years of credited service who becomes totally and permanently disabled from other than duty-connected causes is eligible to receive a non-duty disability allowance computed in the same manner as a full age and service allowance, based upon the member's employment record to the time of disability. Minimum benefit for Police Officers is 48% of FAS if credited service is less than 20 years or 60% of FAS if credited service is 20 or more years. Minimum benefit for Police Command Officers is based on the earlier of (i) the date the member would have completed 20 (if credited service is less than 20 years) or 25 years of service (if credited service is 20 or more years) or (ii) the date the member would have reached 50 years of age. Minimum benefit for Firefighters is based on the earlier of (i) the date the member would have completed 20 (if credited service is less than 20 years) or 25 years of service (if credited service is 20 or more years) or (ii) the date the member would have reached 55 years of age.

Death-in-Service Benefits. Upon the death of a member, surviving dependents are eligible to receive the following benefits, subject to offsets for Worker's Compensation and Social Security.

- (a) The widow receives an allowance equal to the Option B-100 allowance (joint and 100% survivor actuarial equivalent benefit) which would have been payable to her had the deceased member retired the day preceding the date of his death and elected Option B-100. The minimum allowance payable to the widow is 20% of the member's FAS. If the death was determined to be duty-related, the minimum allowance payable to the widow is 72% of the member's final average salary (60% if the member was hired after June 30, 1992).
- (b) Dependent children under age 18 (up to age 23 if they are continuous full-time students) each are eligible to receive an allowance of 15% of the member's FAS. If there are 4 or more dependent children, each child receives an equal share of 50% of the member's FAS.
- (c) If there are neither a widow nor children, each dependent parent is eligible to receive an allowance equal to 15% of FAS.

Compensation. Compensation upon which members contribute includes base pay, longevity pay, educational increment and vacation pay, plus the following additional compensation items:

Firefighters: Overtime pay (assumed to be 7.3% of base rate), holiday pay, clothing allowance, acting assignment pay, shop pay and shift pay.

Police Officers and Police Command Officers: Overtime pay, comp. payoff, holiday pay, clothing allowance, acting assignment, witness fees and shift pay.

The average of the additional compensation items is used to annually adjust the FAS Adjustment Factor. In addition, compensation will not include any amount that would cause the System to be in violation of IRC Sections 401(a) (17) or 415(d).

Member Contributions. Member contribution rates for Firefighters, Police Officers and Sergeants, and Police Command Officers shall be payable in accordance with the following table.

System Funding Represented As a Percentage of Valuation Assets to Actuarial Accrued Liabilities	Firefighters 01/01/09-06/30/12	Fire Chief From & After 09/05/10	Police Officer and Sergeants 07/01/11- 06/29/13	Police Command 06/30/10- 06/30/13	Police Chief and Deputy Police Chief 09/05/10- 06/30/13
Below 100%	7.20%	12.96%	8.66%	9.69%	14.90%
100% - 104.999%	6.20%	11.96%	7.66%	8.69%	13.90%
105% - 109.999%	5.20%	10.96%	6.66%	7.69%	12.90%
110% - 114.999%	4.20%	9.96%	5.66%	6.69%	11.90%
115+%	3.20%	8.86%	4.66%	5.69%	10.90%

Effective July 1, 2013, member contribution rates shall be payable in accordance with the following table.

System Funding Represented As a Percentage of Valuation Assets to Actuarial Accrued Liabilities	Firefighters	Fire Chief	Police Officers & Sergeants	Police Command	Police Chief and Deputy Police Chief
Below 100%	7.75%	12.96%	8.66%	9.69%	14.90%
100% - 104.999%	6.75%	11.96%	7.66%	8.69%	13.90%
105% - 109.999%	5.75%	10.96%	6.66%	7.69%	12.90%
110% - 114.999%	4.75%	9.96%	5.66%	6.69%	11.90%
115% - 119.999%	3.75%	8.86%	4.66%	5.69%	10.90%
120% - 124.999%	3.75%	8.86%	4.00%	4.86%	10.07%
125% - 129.999%	3.75%	8.86%	3.34%	4.03%	9.24%
130% - 134.999%	3.75%	8.86%	2.68%	3.20%	8.41%
135+%	3.75%	8.86%	2.02%	2.37%	7.58%

The member contribution rates used for the December 31, 2010 valuation were 4.20%, 4.00%, 5.69%, 10.90%, and 9.96% for Firefighters, Police Officers and Sergeants, Police Command Officers, Police Chief and Deputy Police Chiefs, and Fire Chief respectively.

If a member terminates employment before any allowance is payable, accumulated contributions (contributions plus regular interest) are refunded.

Employer Contributions. The City contributes the remainder amounts necessary to maintain the Retirement System in sound financial condition in accordance with its funding objectives.

Automatic Post-Retirement Benefit Increases. Post-retirement benefit increases are paid to eligible groups as described in the following table.

	Firefighters	Police Officer and Sergeants	Police Command
Effective date	Retired on or after July 1, 2007	Retired on or after December 17, 2008	Retired on or after February 21, 2010
Amount of increase	1.5% of original benefit	1.0% of original benefit	1.0% of original benefit
First increase to occur	2 years after retirement	5 years after retirement	5 years after retirement

Benefit recipients who are eligible for the automatic post-retirement increase do not participate in the 13th check program.

13th Check. For members not eligible for automatic post-retirement increases, one-half of net investment income over 8% which is attributable to retired life assets is distributed annually (in January) to retired members and beneficiaries who have been on the retirement rolls for 5 years in the form of a 13th check. Net investment income is based on a book value rate of return averaged over the preceding 5 plan years. The distribution is in proportion to points. An individual's points are determined by multiplying (i) the number of full years of retirement, to a maximum of 15, by (ii) the number of years, and fractions thereof, of service at retirement. Subsequent to the calculations above, the benefit so calculated for Chief of Police, Deputy Chief, Police Command, Police Officers and Sergeants, Firefighter Service, and beneficiaries having had at least 10 years of service under either bargaining unit shall be increased by twenty percent.

F6. Total Recognized Investment Gain (Loss)	(30,047,687)	(22,002,012)	(17,783,054)	(17,783,053)	(14,997,770)	12,264,632	4,218,957
G. Funding Value End of Year: A+D+E3+F6	346,472,441	334,247,051	328,609,947				
H. Difference Between Market & Funding Values	(117,405,463)	(55,175,077)	(16,297,234)				
I. Recognized Rate of Return	-0.91%	1.00%	2.08%				
J. Market Value Rate of Return	-31.62%	29.66%	16.75%				
K. Ratio of Funding Value to Market Value	151.3%	119.8%	105.2%				

* The Funding Value of Assets recognizes assumed investment return (line E3) fully each year. Differences between actual and assumed investment return (line E4) are phased in over a closed 5-year period. During periods when investment performance exceeds the assumed rate, Funding Value of Assets will tend to be less than market value. During periods when investment performance is less than the assumed rate, Funding Value of Assets will tend to be greater than market value. If assumed rates are exactly realized for 4 consecutive years, funding value will become equal to market value.

SECTION C

SUMMARY OF VALUATION METHODS AND ASSUMPTIONS

VALUATION METHODS

Normal cost and the allocation of benefit values between service rendered before and after the valuation date was determined using the individual entry-age actuarial cost method having the following characteristics:

- (i) The annual normal costs for each individual active member, payable from the date of employment to the date of retirement, are sufficient to accumulate the value of the portion of the member's benefit at the time of retirement;
- (ii) each annual normal cost is a constant percentage of the member's year-by-year projected covered pay.

Financing of Unfunded Actuarial Accrued Liabilities. Unfunded actuarial accrued liabilities were amortized by level (principal & interest combined) percent-of-payroll contributions over a period of 30 years.

Valuation Asset Method. Valuation Assets were determined using a method which phases in each year's differences between actual and assumed investment return over a closed five year period.

ACTUARIAL ASSUMPTIONS USED FOR THE VALUATION ADOPTED BY THE BOARD OF TRUSTEES

The actuary calculates contribution requirements and actuarial present values of the System by applying assumptions to the benefit provisions and census data information furnished, using the valuation methods described on the previous page.

The principal areas of financial risk which require assumptions about future experiences are:

- (i) Long-term rates of investment return to be generated by the assets of the System,
- (ii) patterns of pay increases to members,
- (iii) rates of mortality among members, retirants and beneficiaries,
- (iv) rates of withdrawal of active members,
- (v) rates of disability among members, and
- (vi) the age patterns of actual retirement.

In a valuation, the actuary calculates the monetary effect of each assumption for as long as a present covered person survives - - - a period of time which can be as long as a century.

Actual experience will not coincide exactly with assumed experience, regardless of the wisdom of the assumptions, or the skill of the actuary and the precision of the many calculations made. Each valuation provides a complete recalculation of assumed future experience and takes into account all past differences between assumed and actual experience. The result is a continual series of adjustments (usually small) to the computed contribution rate.

From time to time it becomes appropriate to modify one or more of the assumptions, to reflect experience trends (but not random year-to-year fluctuations).

The rates of salary increase used for individual members are in accordance with the following table. This assumption is used to project a member's current salary to the salaries upon which benefit amounts will be based.

Service at Beginning of Year	Salary Increase Assumptions For an Individual Member		
	Merit & Seniority	Base (Economic)	Increase Next Year
1	17.0%	3.5%	20.5%
2	7.0	3.5%	10.5
3	6.0	3.5%	9.5
4	5.0	3.5%	8.5
5	4.0	3.5%	7.5
6 and over	1.0	3.5%	4.5

These rates were first used for the December 31, 2010 valuation.

If the number of active members remains constant, then the total active member payroll will increase 3.5% annually, the base portion of the individual salary increase assumptions. This increasing payroll was recognized in amortizing unfunded actuarial accrued liabilities.

The rate of investment return was 7.50% a year compounded yearly (net after expenses and before adjustment for the 13th check program). This assumption is used to make money payable at one point in time equal in value to a different amount of money payable at another point in time. This assumption was first used for the December 31, 2010 valuation.

The assumed real return for funding purposes is the rate of return in excess of average salary increases.

The mortality table was the 1983 Group Annuity Mortality Table setback three years for males and two years for females. (These tables were first used for the December 31, 2005 valuation and benefit computations.)

Sample Ages	Value at Retirement of \$1 Monthly for Life		Future Life Expectancy (Years)	
	Men	Women	Men	Women
50	\$142.39	\$149.52	31.90	36.81
55	135.01	143.78	27.42	32.10
60	125.92	136.25	23.13	27.48
65	114.57	126.63	19.02	23.02
70	101.23	114.62	15.23	18.76
75	87.08	100.30	11.92	14.81
80	72.40	85.10	9.08	11.40

This assumption is used to measure the probabilities of members dying before retirement and the probabilities of each benefit payment being made after retirement. These rates were first used for the December 31, 2005 valuation.

The rates of retirement used to measure the probability of eligible members retiring during the next year were as follows:

Retirement Ages	Percent Retiring		Retirement Ages	Percent Retiring	
	Police	Fire		Police	Fire
50	25%	25%	60	25%	40%
51	25	25	61	25	40

56	25	25	66	60	40
57	25	25	67	70	40
58	25	25	68	80	40
59	25	25	69	90	40
			70	100	100

A Police member is eligible for retirement after both attaining age 50 and completing 10 or more years of service. Fire members are eligible after attaining age 55 with 10 or more years of service or at the age their service reaches the service credit limit.

Rates of separation from active membership were as follows:

(Rates do not apply to members eligible to retire and do not include separation on account of death or disability.) This assumption measures the probabilities of members remaining in employment. These rates were first used for the December 31, 2010 valuation.

Sample Ages	% of Active Members Separating Within Next Year	
	Police	Fire
25	4.60%	2.76%
30	3.80	2.28
35	2.60	1.56
40	1.80	1.08
45	1.40	0.84
50	1.20	0.72
55	1.20	0.72
60	1.20	0.72

The rates of disability were as follows:

Sample Ages	% of Active Members Becoming Disabled Within Next Year	
	Police	Fire
20	0.08%	0.16%
25	0.08	0.16
30	0.08	0.16
35	0.18	0.36
40	0.39	0.78
45	0.70	1.40
50	1.12	2.24
55	1.67	3.34

		Duty Related	Non-Duty Related
Cause of Disability:	Male	90%	10%
	Female	90%	10%

SUMMARY OF ASSUMPTIONS USED
DECEMBER 31, 2010
MISCELLANEOUS AND TECHNICAL ASSUMPTIONS

Marriage Assumption. 90% of males and 90% of females are assumed to be married for purposes of death-in-service benefits.

Pay Increase Timing. Beginning of (Fiscal) year. Reported pays represent amounts paid to members during the year ended on the valuation date.

Decrement Timing. Decrements of all types are assumed to occur mid-year.

Eligibility Testing. Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.

Benefit Service. Exact fractional service is used to determine the amount of benefit payable.

Decrement Relativity. Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects.

Liability Adjustments. Retirement present values were increased by 12.2% and 12.7% for police and fire, respectively, to account for the FAS Adjustment Factor.

Normal Form of Benefit. The assumed normal form of benefit is the straight life form.

Incidence of Contributions. Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made. New entrant normal cost contributions are applied to the funding of new entrant benefits.

SECTION D

BASIC FINANCIAL OBJECTIVE AND OPERATION OF THE RETIREMENT SYSTEM

BASIC FINANCIAL OBJECTIVE AND OPERATION OF THE RETIREMENT SYSTEM

Benefit Promises Made Which Must Be Paid For. A retirement system is an orderly means of handing out, keeping track of, and financing contingent pension promises to a group of employees. As members of the Retirement System acquire a unit of service credit they are, in effect, handed an “IOU” which reads: “The Retirement System promises to pay you one unit of retirement benefits; payments in cash commencing when you retire.”

The principal related financial question is: When shall the money required to cover the “IOU” be contributed? This year, when the benefit of the member’s service is received? Or, some future year when the “IOU” becomes a cash demand?

The constitution of the State of Michigan is directed to the question:

“Financial benefits arising on account of service rendered in each fiscal year shall be funded during that year and such funding shall not be used for financing unfunded accrued liabilities.”

This Retirement System meets this constitutional requirement by having the following ***Financial Objective: To establish and receive contributions, expressed as percents of active member payroll, which will remain approximately level*** from year-to-year and will not have to be increased for future generations of taxpayers.

Translated into actuarial terminology, a level percent-of-payroll contribution objective means that the contribution rate must be at least:

Normal Cost (the current value of benefits likely to be paid on account of service being rendered in the current year)

. . . plus . . .

Interest on the Unfunded Actuarial Accrued Liability (the difference between the actuarial accrued liability and current system assets).

If contributions to the Retirement System are less than the preceding amount, the difference, *plus investment earnings not realized thereon*, will have to be contributed at some later time, or, benefits will have to be reduced, to satisfy the fundamental fiscal equation under which all retirement programs must operate; that is:

$$B = C + I - E$$

Benefit payments to any group of members and their beneficiaries cannot exceed the sum of:

Contributions received on behalf of the group from members and the City

. . . plus . . .

Investment earnings on plan assets

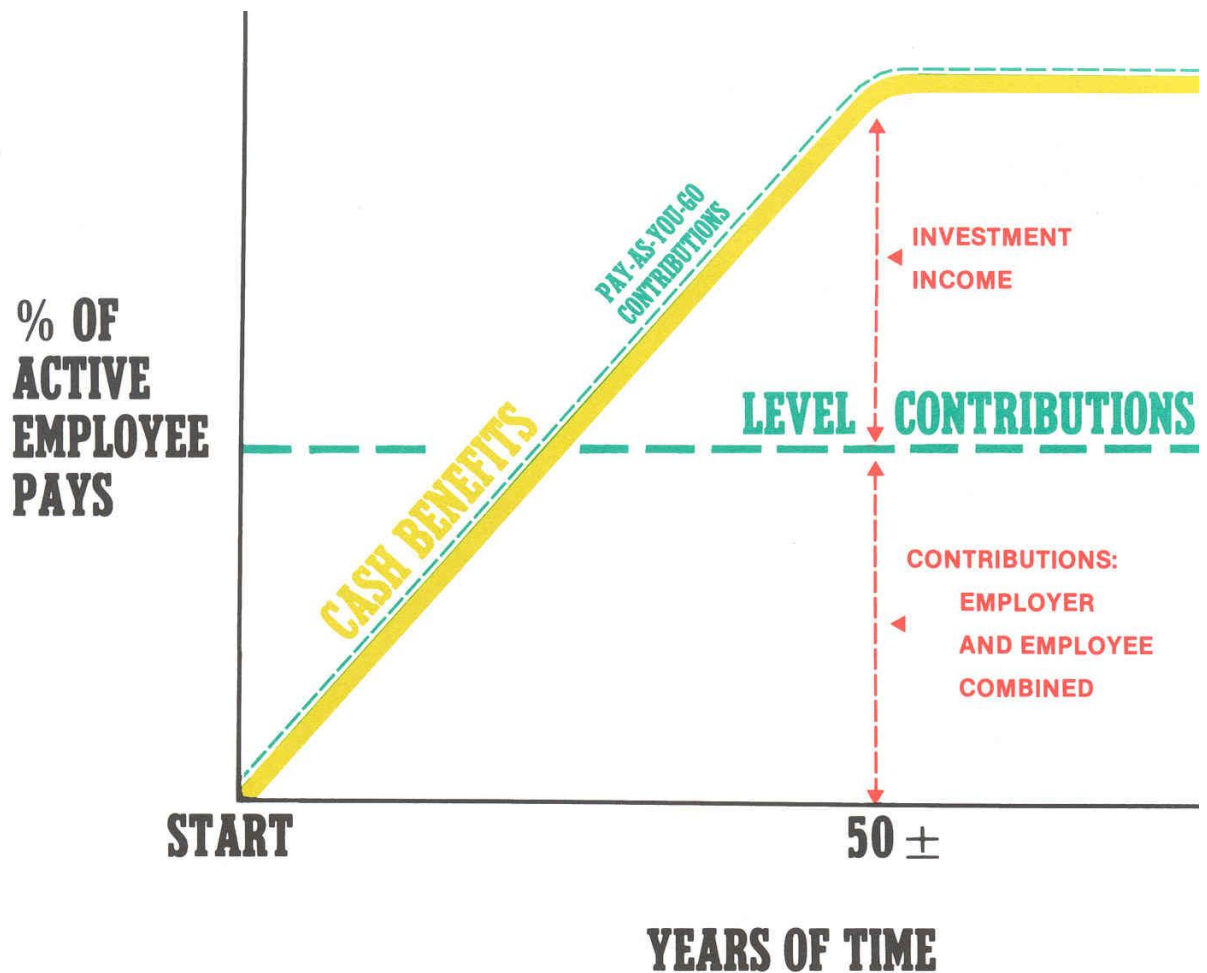

. . . minus . . .

Expenses incurred in operating the program.

There are retirement programs designed to defer the bulk of contributions far into the future. Lured by artificially low present contributions, the inevitable consequence is a relentlessly increasing contribution rate -- to a level greatly in excess of the level percent of payroll rate. *This method of financing is prohibited in Michigan by the state constitution.*

A by-product of the level percent-of-payroll contribution objective is the accumulation of invested assets. Invested assets are a by-product of level percent-of-payroll contributions, not the objective. Investment income becomes a major contributor to the Retirement System, and the amount is directly related to the amount of contributions and investment performance.

Computed Contribution Rate Needed To Finance Benefits. From a given schedule of benefits and from the data furnished him, the actuary calculates the contribution rate *by means of an actuarial valuation* - the technique of assigning monetary values to the risks assumed in operating a retirement program.

CASH BENEFITS LINE. This relentlessly increasing line is the fundamental reality of retirement plan financing. It happens each time a new benefit is added for future retirements (and happens regardless of the design for contributing for benefits).

LEVEL CONTRIBUTION LINE. Determining the level contribution line requires detailed assumptions concerning a variety of experiences in future decades, including:

Economic Risk Areas

- Rates of investment return
- Rates of pay increase
- Changes in active member group size

Non-Economic Risk Areas

- Ages at actual retirement
- Rates of mortality
- Rates of withdrawal of active members (turnover)
- Rates of disability

GLOSSARY

Actuarial Accrued Liability. The difference between (i) the actuarial present value of future plan benefits, and (ii) the actuarial present value of future normal cost. Sometimes referred to as “accrued liability” or “past service liability.”

Accrued Service. The service credited under the plan which was rendered before the date of the actuarial valuation.

Actuarial Assumptions. Estimates of future plan experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Decrement assumptions (rates of mortality, disability, turn-over and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (salary increases and investment income) consist of an underlying rate in an inflation-free environment plus a provision for a long-term average rate of inflation.

Actuarial Cost Method. A mathematical budgeting procedure for allocating the dollar amount of the “actuarial present value of future plan benefits” between the actuarial present value of future normal cost and the actuarial accrued liability. Sometimes referred to as the “actuarial funding method.”

Actuarial Equivalent. A single amount or series of amounts of equal value to another single amount or series of amounts, computed on the basis of the rate(s) of interest and mortality tables used by the plan.

Actuarial Present Value. The amount of funds presently required to provide a payment or series of payments in the future. It is determined by discounting the future payments at a predetermined rate of interest, taking into account the probability of payment.

Amortization. Paying off an interest-bearing liability by means of periodic payments of interest and principal, as opposed to paying it off with a lump sum payment.

GLOSSARY

Experience Gain (Loss). A measure of the difference between actual experience and that expected based upon a set of actuarial assumptions during the period between two actuarial valuation dates, in accordance with the actuarial cost method being used.

Normal Cost. The annual cost assigned, under the actuarial funding method, to current and subsequent plan years. Sometimes referred to as “current service cost.” Any payment toward the unfunded actuarial accrued liability is not part of the normal cost.

Plan Termination Liability. The actuarial present value of future plan benefits based on the assumption that there will be no further accruals for the future service and salary. The termination liability will generally be less than the liabilities computed on a “going-concern” basis and is not normally determined in a routine actuarial valuation.

Reserve Account. An account used to indicate that funds have been set aside for a specific purpose and are not generally available for other uses.

Unfunded Actuarial Accrued Liability. The difference between the actuarial accrued liability and Valuation Assets. Sometimes referred to as “unfunded accrued liability.”

Valuation Assets. The value of current plan assets recognized for valuation purposes. Generally based on a phase-in of differences between actual and assumed market rates of return.

@ One-half year ended December 31.

* Since it was reported to the actuary that the City's practice is to contribute the percent-of-payroll employer contribution rate shown in the actuarial valuation report, the annual required contributions shown in the Schedule of Employer Contributions are the actual contributions made by the City in the fiscal year.

GASB STATEMENTS NO. 25 AND NO. 27
REQUIRED SUPPLEMENTARY INFORMATION

The information presented in the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest valuation date follows:

Valuation date:	December 31, 2010
Actuarial cost method:	Individual entry age
Amortization method:	Level percent open
Remaining amortization period:	30 years per City Commission
Asset valuation method:	5 year smoothed market
Actuarial assumptions:	
Investment rate of return	7.36% (7.50% for groups receiving annual postretirement increases, 7.25% for groups participating in the 13th check program)
Projected salary increases including inflation at	20.5% - 3.5% 3.50%
Cost-of-living adjustments:	Ad hoc "13th check" tied to plan investments for benefit recipients who do not have an automatic benefit increase. 1.5% simple escalator for firefighter's retired on or after July 1, 2007 with commencement delayed 2 years after retirement. 1.0% simple escalator for police command officer retired on or after February 21, 2010 with commencement delayed 5 years after retirement. 1.0% simple escalator for police officers and sergeants retired on or after December 17, 2008 with commencement delayed 5 years after retirement.

Membership of the plan consisted of the following at December 31, 2010, the date of the latest actuarial valuation:

Retirees and beneficiaries receiving benefits	612*
Terminated plan members entitled to but not yet receiving benefits	24
Active plan members	<u>534</u>
Total	1,170

* Includes alternate payees under Michigan Eligible Domestic Relations Order.

May 16, 2011

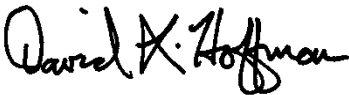

Ms. Peggy Korzen, Executive Director
City of Grand Rapids Police and Fire
Retirement System
233 East Fulton, Suite 216
Grand Rapids, Michigan 49503

Dear Peggy:

Enclosed are 25 copies of the December 31, 2010 Actuarial Valuation for the City of Grand Rapids Police and Fire Retirement System.

As always, your questions and comments are welcome.

Sincerely,

David L. Hoffman
